

Sequencing Sounds - Year Three

Vocabulary	Word Definition
Programming	Computer programming is writing a group of instructions for a computer.
Sprite	The images on a Scratch computer program screen, e.g. the ginger cat.
Backdrop	An image that can be shown on the Stage. It is similar to a costume, except that it is shown on the stage instead.
Command	Giving the computer an instruction.
Sequence	A set of logical steps (instructions) carried out in order.
Algorithm	A set of guidelines that describes how to perform a task. Think of an algorithm as step-by-step instructions.

Questions

1. Write an algorithm for how to make a sandwich.
Sequence it in the correct order.
2. How do you change your sprite on scratch?
3. Why is it essential not to miss any steps out when giving instructions?
