

Sharing Information - Year Five

Vocabulary	Word Definition
World Wide Web	The part of the Internet that contains websites and webpages.
Internet	A network, or system, that connects millions of computers worldwide. This can be accessed through technology such as laptops, computers, phones, iPads, etc.
Network	A network consists of two or more computers that are linked in order to share resources (such as printers and CDs), exchange files, or allow electronic communications. The computers on a network may be linked through cables, telephone lines, radio waves, satellites.
Digital systems	Digital systems are designed to store, process, and communicate information in digital form. The digital computer, more commonly called the computer, is an example of a typical digital system .
Copyright	Refers to the legal right of the owner of intellectual property. In simpler terms, copyright is the right to copy. This means that the original creators of products and anyone they give authorization to are the only ones with the exclusive right to reproduce the work.

Questions
