

3D Modelling - Year Six

Vocabulary	Word Definition
3D Model	3-dimensional basically refers to a shape that 'pops out' at you. More specifically, 3-dimensional shapes are not flat.
graphics	A pictorial image or series of images displayed on a computer screen.
resize	To change the size of something (smaller/larger).
construct	To make or form something by combining parts.
duplicate	The exact same of something. A copy of something.

Questions

1. What is the difference between a 2D and a 3D shape?
2. What does 'enhance' mean?
3. Why might you have to 'resize' a model?
4. Give examples of 3D models
