

Computing Systems and Networks

Vocabulary	Word Definition
Computer	A computer is an electronic device that manipulates information, or data. It has the ability to store, retrieve, and process data. You may already know that you can use a computer to type documents, send email, play games, and browse the internet.
Mouse	The mouse is a computer input device used to move a cursor around a screen. The mouse buttons are used to interact with whatever is being pointed at.
Keyboard	An input device that allows a person to enter letters, numbers, and other symbols (these are called characters) into a computer .
Typing	To write with a keyboard. To write using an electronic device by pressing keys (letters, numbers or characters).
Drag	The action of selecting an object or section of text and moving it, usually to drop in an alternate area.
