

Digital Photography - Y2

Vocabulary	Word Definition
Photograph	A way of making a picture using a camera
Artificial light	Artificial light is created by humans. Flashlights, table lamps, neon signs, and televisions are some sources of artificial light .
Landscape	Generally refers to the camera's orientation in a horizontal display. This causes an image top and bottom edges to be longer than the sides
Portrait	Portrait format basically refers to when the picture is in the vertical display, which means the side edges are longer than the bottom and top edges
Editing	Changing the way an image looks.
