

Programming - Year Four

Vocabulary	Word Definition
Algorithm	A set of guidelines that describes how to perform a task. Think of an algorithm as step-by-step instructions.
Debug	To identify and remove errors from computer software.
Loops	A loop in a computer program is an instruction that repeats until a specified condition is reached.
Sequence	A set of logical steps (instructions) carried out in order.
Repetition	Repetition in a program means that lines of code will be run multiple times.

Questions

1. Can you develop your programming skills and use repetition to create shapes and games using Scratch?
2. Give an example of when you had to debug.
3. Evaluate your design. What do you like about it? What went well? How can you improve next time?
